1. Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA has created a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

1.1. Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up VS Graphical User Interface (GUI) Release 1.7.41. The release software package is comprised of the following:

- VS GUI application 1.7.41.1
- VistA M patch SD*5.3*843

1.2. Audience

This document targets the administrators and users of the VistA Scheduling package.

2. This Release

Please see Features and Functionality for a summary of the enhancements and defect corrections implemented with VS GUI Release 1.7.41.1 and VistA patch SD*5.3*843.

3. Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.41.1 package and VistA patch SD*5.3*843.

3.1. Enhancements Implemented and Defects Fixes

Table 1 lists the enhancements implemented and defects corrected in VS GUI Release 1.7.41.1 and VistA patch SD*5.3*843. The work item ID is the Jira issue number.

Table 1: Enhancements and Defects Fixes

Work Item ID	Summary of Change
VSE-4961	VistA: Remove the lock on Clinics when trying to schedule appointments
VSE-5189	VistA: Modify SDES EDIT CLINIC AVAILABILITY to return an error if the user does not enter a date
VSE-5249	RTC order in CPRS has been discontinued by Provider and the RTC remains in VSE
VSE-5339	VistA: VetText & TMP: Check the Validation of the Appointment Request
VSE-5451	VistA: Block & Move of Recall Appointment returns invalid appointment type
VSE-4496	VistA: Modify SDES CREATE APPOINTMENTS to not allow creation of appointment from a dispositioned appointment request
VSE-5100	VistA: Close open requests for deceased veterans
VSE-5109	VistA: Modify SDES CREATE VET REQ SCHED APPT to set the request institution to the clinic institution

Work Item ID	Summary of Change
VSE-5138	VS GUI: Do Not Allow Control Characters in Comments Field
VSE-5157	VS GUI: Remove Date Column from RM Grid
VSE-5160	I-0001568 VistA Option for Open Veteran Requests
VSE-5163	VistA: Modify SDES CREATE APPOINTMENTS to set the Mission Act Eligible flag
VSE-5170	VistA: Update SDES GET PATIENT FLAGS to return only flags in active status
VSE-5180	VistA: Modify SDES PATIENT SEARCH RPC to return Local, National, and Sensitive Patient flags
VSE-5281	VistA: Add EAS Tracking Number to the appointment request object for consults
VSE-5282	VistA: Modify SDES GET MISSION ACT ELIG RPC to point to SDESMISSIONELG
VSE-5411	GUI: Update demographics indicator to use new TAS-P cw endpoint
VSE-5455	VistA: Create a post install routine to report on Block & Move appointments or RECALL type

4. User Documentation

The documentation distributed with VS GUI Release 1.7.41.1 is available for download from the VA Software Document Library (VDL).

5. Known Issues

All known issues resolved by this release were documented in ServiceNow tickets and/or Jira issues as part of the ongoing, post-warranty, sustainment effort. Appropriate issues, workarounds, and step by step resolutions are documented in Knowledge Base articles and included in the searchable ServiceNow Knowledge Base hosted by the VA Enterprise Service Desk (ESD).
